SUMMARY

Data Scientist & AI Engineer with 3+ years delivering **GenAI**, **ML** and **BI solutions** in international environments (France, Japan, Singapore). Experienced in turning complex data and LLM capabilities into scalable products with measurable business impact.

WORK EXPERIENCE

Data Scientist **Sept. 2024 - Aug. 2026**

MERCK Healthcare, Singapore

- Designed and deployed AI solutions for regional insight and analytics use cases, transforming fragmented market and field data into scalable decision-support tools
- Built a RAG-based LLM application to extract and structure insights from pharma market reports, creating a new source of regional market intelligence for strategic teams (Python, Streamlit, AzureOpenAI, Qdrant)
- Developed LLM workflows to translate and summarize 300+ monthly field-force feedback, surfacing qualitative trends across countries and improving visibility on key market signals (Python, Snowflake, LangChain)
- Automated regional market analysis workflows and built an agentic chatbot enabling natural-language interaction with the insights database (Python, OpenAI, LangGraph, Streamlit)

Data Analyst **Mar. 2024 - Aug. 2024**

MECADAQ, France

- Developed BI dashboards to monitor real-time stock valuations across 3+ global sites, improving operational visibility and reducing manual reporting for finance teams (SQL, Power Query, Excel)
- Supported the integration of multi-site data into a unified reporting system, improving consistency and accessibility across international operations (Talend, SQL)

Apprentice Data Scientist **Sept. 2022 - Sept. 2023**

BNP Paribas Personal Finance, France

- Benchmarked categorical encoding techniques to improve the performance of credit scoring models, contributing to modeling best practices across the team (Optuna, scikit-learn, plotly)
- Developed and optimized tree-based classification models for predictive analytics use cases (XGBoost, Random Forest, scikit-learn)

AI Research Intern at the Knowledge System laboratory **May. 2022 - Aug. 2022**

Osaka Metropolitan University, Japan

- Developed an emotion prediction system based on facial action units for human behavior analysis tasks (Python, Openface)
- Conducted research on AI-supported collaborative learning systems in educational settings

EDUCATION

Master's Degree of Software Engineering specialized in AI **2020 - 2023**

CY Tech, France

University Diploma of Higher Education in Statistics and Data Analysis **2018 - 2020**

Université de Pau et des Pays De L'Adour, France

HARD SKILLS

LLMs & GenAI: RAG, LangChain, LangGraph, CrewAI, MCP, Agentic AI
AI/ML: Transformers, Deep Learning, Reinforcement Learning, Image Processing
Programming: Python, C++, JavaScript, HTML/CSS
Data & Storage: SQL, Pandas, Snowflake, Qdrant, Talend
Web & APIs: FastAPI, Streamlit, Plotly Dash, Gradio, React
Tools & Infra: Docker, Git, Power BI

SIDE PROJECTS

Natural language-to-SQL app using Google Gemini & MCP to auto-generate interactive visualizations from database queries (Python, Streamlit, Plotly, Docker) - 2026

Local RAG cooking assistant using Ollama & FAISS to answer recipe questions from a vector-indexed knowledge base via a chat UI (Python, FastAPI, Mistral 7B, JS) - 2025

LANGUAGES

French: Native • Japanese: Intermediate • English: Full Professional (TOEIC score 970/990) • Spanish: Intermediate

INTERESTS AND HOBBIES

Rugby, Hiking, Surfing

Analogue photography: Exhibited work at local medical center
